

Join us in YOUR Region for the **FutureWork Prosperity Tour!**

The [Institute for Emerging Issues](#) at NC State University (IEI), along with its regional partners, invites you to attend the “[FutureWork Prosperity Tour](#),” coming soon to a community near you! Your leadership is central to the issues related to the future of work in your region, and your voice needs to be heard in this conversation!

With generous support from the **Duke Energy Foundation** and the **Local Government Federal Credit Union**, IEI staff and friends will travel by bus to each of North Carolina’s eight [Prosperity Zones](#), as defined by the NC Department of Commerce. **Upcoming tour dates:**

May 17	Southwest Region	June 28	Southeast Region
June 7	Sandhills (South Central Region)	June 30	Northeast Region
June 22	North Central Region	July 7	Northwest Region
June 23	Piedmont-Triad (Central) Region	July 8	Western Region

Each of the regional convenings will introduce communities to data, themes, and resources from the [31st Emerging Issues Forum, FutureWork](#), where more than 1,100 business, education and policy leaders gathered to consider: *As technology and demography shift, how can North Carolina prepare today to create enough good jobs for tomorrow?*

IEI is excited to expand its engagement beyond the Emerging Issues Forum, meeting with educational institutions, businesses, and workforce development and policy leaders to share region-specific data and insights from the IEI [FutureWork Disruption Index for North Carolina](#), and to highlight county-by-county vulnerability statistics. IEI will challenge the groups to determine whether their regional talent development systems are “FutureWork-ready.”

Did You Know? The [Disruption Index](#) projects that, *within just a single generation, automation and related technological advances could cause North Carolina to lose more than 25% of their current jobs and nearly 20% of current wages on average*—that’s potentially more than \$37 billion in lost wages across the state.

Regional leaders will be unsettled by projections about the scope of inevitable upcoming job loss. But this Prosperity Tour offers an opportunity to focus on using the job loss numbers to determine whether your region is prepared to grow the talent demanded by the occupations that will remain in high demand, as well as by those occupations that are yet to be created.

The goal of this tour is two-fold. First, IEI will host an information session at an educational institution in your area to engage students in thinking about how best to align their educational plans with tomorrow’s realities. Second, at the regional stakeholder convening, IEI will 1) discuss the projected demographic and economic shifts; 2) explore with local leaders job loss projections for your region; and 3) examine how job skills have changed over time; and 4) discuss what we can do to prepare tomorrow’s workforce.

In addition, IEI will learn from you and your local leaders about how best to prepare for this changing economy. We’ll use this information to inform future discussion with the state’s policy leaders at the NC General Assembly, nonprofit leaders, state agencies, and industry leaders.

We hope you’ll join the Institute for Emerging Issues, along with other key leaders from business, government, and higher education for this critical convening. Together, we can strengthen the competitiveness and prosperity of our great state! To learn more about your county’s vulnerability to jobs disruption due to automation, for tour dates and destinations, and to register to participate in a convening in your region, visit emergingissues.org/FutureWork/Tour.
